PREFACE

Since March 20, 1922, the annual appropriation acts for the Office of Superintendent of Documents have included an appropriation for distribution of public documents to depository libraries with the provision that no part of this sum shall be used to supply to depository libraries any documents, books, or other printed matter not requested by such libraries.

In order to enable libraries to make the selection required, this list has been prepared, arranged alphabetically by Executive Departments or independent offices, and by bureaus and series thereunder, with a brief description of the character of the publication where necessary.

This list includes all classes of publications made available for distribution to libraries and replaces the six lists previously issued for selective purposes.

As the law makes the selective plan for depository libraries mandatory rather than a privilege, it is necessary that this list be promptly checked and returned to the Superintendent of Documents in order that libraries may receive their depository shipments.

An item number has been assigned to each entry so that in making changes in selections, reference may be made to item number instead of referring to title or class of publication.

The law providing for the distribution of Government publications to depository libraries limits the edition printed for that purpose to the number of copies selected by libraries in advance of printing, allowing only one copy of a publication for each library. These copies are forwarded to the libraries when printed.

The Office of the Superintendent of Documents compiles and mails to libraries each month an invoice to be used for checking purposes. If any of the publications that have been selected are missing from the shipment, this shortage should be reported promptly.

INSTRUCTIONS

Check against numbers shown opposite entries if you wish to receive copies of the publications described therein and fill in the information called for below:
